Filed: March 2, 2004

Applicant: Sexton, et al.

TC/AU: 2831

Confirmation No.: 9816

As per the voice message I left for you earlier today, attached are three Replacement Sheets and three Annotated Sheets for FIGS. 3A-3R and 4A-4C of U.S. Application Serial No. 10/790,055, entitled "Electrical Wire and Method of Fabricating the Electrical Wire." As shown in the Annotated Sheets, amendments are proposed to FIGS. 3B, 3C, 3G, and 4A. These amendments to the figures were just recently pointed out to us by a foreign associate. The amendments relate to either properly labeling elements of the wire or extending lead lines to properly identify elements referred to by reference numerals, as set forth in the Specification. I had a conversation with you a few weeks ago regarding the possibility of entering these amendments as part of an Examiner's Amendment prior to the issuance of the present application as a U.S. patent. I apologize for the delay in communicating these amended figures to you. It took me a while to obtain corrected figures from our draftsman. In order to have these changes appear in the issued patent, I would like to discuss the possibility of an Examiner's Amendment with you. Accordingly, I would appreciate it if you could give me a call at your earliest convenience.
